Abstract (en)  
[origin: WO2018141522A1] The invention relates to a method for monitoring an interior (2) of a motor vehicle (1) by means of at least one camera (4) directed into the interior (2) during a temporary access to the interior (2) or to a luggage compartment (3) of the motor vehicle (1), wherein the camera (4) is switched on by a controller (5) during the entire access or in the event of deviations from specified rules for the access and forwards recorded data to a memory (10; 12).
