Abstract (en)

[origin: WO2018142048A1] The invention relates to a floor crane (3) intended for being installed on a container (100), and a crane (3) set up by means of an installation device (1) that allows the crane (7) to pass from a horizontal position to a vertical position in which it can be clamped onto a surface of a container (100). The invention makes it possible to set up a field workshop comprising a pair of parallel containers (100) and a mobile crane (200). The invention also relates to the device (1) for installing the crane (3), the container (100) thus equipped, a field workshop and a method for setting up said field workshop.
