Abstract (en)

[origin: WO2018141727A1] The invention relates to a method for treating a web (2) of paper, cardboard or other fibrous material before the smoothing thereof. The aim of the invention is to achieve an optimum surface quality of the fibrous material web (2) with as little loss of volume as possible. To this end, the fibrous material web (2) is moistened in at least one partial treatment process, cooled with air and then moistened again.
