Abstract (en)
[origin: WO2018142272A1] Method of controlling personal information and allowing interaction with authenticated users wherein a clearinghouse (10) is created for the exchange of personal data, alternatively personally identifiable information between a buyer / business (12) and a seller / consumer (14) using a private ledger blockchain encryption, linked to an obfuscated user ID, to ensure an irrefutable audit trail for the transfer and the payment of the personal data, alternatively personally identifiable information.
