Abstract (en)

[origin: WO2018144281A1] In embodiments of the present disclosure, a user equipment (UE) may transmit, in a UE network capability information element (IE), an indication that the UE supports light connection. The UE may further identify, from a third generation partnership project (3GPP) network with which the UE is coupled, an indication that the network supports light connection. The UE may further enter, based on the indication that the network supports light connection, a light connection mode. Other embodiments may be described and/or claimed.
