Abstract (en)

An installation unit for facilitating the installation of a window frame in a roof structure is disclosed. In comprises an installation sheet and at least one insulation member attached to an outer side of the installation sheet. The installation unit is adapted for being arranged in the opening in the roof structure, such that it lines the opening and such that at least one insulation member is in contact with the roof structure. The installation unit may comprise more than one insulation member and/or form part of a sealing collar. In use, the installation unit is arranged in the opening in the roof structure with its length direction parallel to the roof plane, and when placing a window frame in the opening, the window frame comes into engagement with the inner side of the installation sheet.
