Abstract (en)

[origin: WO2018146017A1] Façade for a building, comprising insulating elements (3) that are fixed to an outer surface (4) of the building, and at least one fire break (9) arranged to extend horizontally between two superimposed and adjacent insulating elements (3) and fixed to the outer surface (4) of the building, whereby between two horizontally aligned adjacent insulating elements (3) there is provided an insulation element of non-combustible material configured as a molded body (5) that extends in the vertical direction of the outer surface (4) of the building at least until the upper boundary of the fire break (9), particularly above and below said fire break (9), and includes a cavity (6) for receiving energy lines, supply and/or discharge conduits, said cavity extending in the longitudinal direction over the entire length of said molded body.
