Abstract (en)
[origin: WO2018146477A1] A glazing assembly is disclosed, the assembly comprising first and second toughened glass members. Each member comprises a sheet with first and second flanges projecting from opposite ends of the sheet in a direction substantially perpendicular to the sheet, and the first and second flanges of the first member are joined respectively to the first and second flanges of the second member by first and second connector portions such that the first and second flanges of the first member are substantially coplanar with the first and second flanges of the second member, respectively. A modular glazing array is also disclosed. The array comprises a plurality of glazing assemblies arranged side by side, such that at least one pair of joined, coplanar flanges of each of the plurality of glazing assemblies faces a pair of joined, coplanar flanges of another of the plurality of glazing assemblies.
