Abstract (en)
[origin: WO2018145695A1] The invention relates to an electric adapter for electrically connecting electric devices to a socket, comprising a housing portion (2) with at least two contact openings (3, 3') for connecting to a plug of an electric device and with a contact device (4) with at least one pair of contact elements (5) for electrically connecting the adapter (1) to a socket. Each of the contact elements (5) is fixed in the housing portion (2) by means of an anchor portion (6), and at least one contact element (5) has a mechanically deformable first contact element portion (5.1) such that the spacing (d) of the second contact element portions (5.2) which can be plugged into the socket can be changed.
