Abstract (en)
[origin: CA3046010A1] Buckle (1) with a first buckle part (2) and at least one second buckle part (3), wherein the first buckle part (2) has a first buckle main body (4) and a receptacle (5) which is hook-shaped, seen in at least one section, and formed rigidly on the first buckle main body (4), and the second buckle part (3) has a second buckle main body (6) with an inherently rigid hook-in part (7) for hooking into the receptacle (5) of the first buckle part (2), and the first buckle part (2) additionally has at least one bolt (8), wherein the hook-in part (7) has a central web (10) and two side parts (11) protruding on mutually opposite sides from the central web (10), and each of the side parts (11) is delimited by a respective front edge (12), and the front edges (12) of the side parts (11) are oriented running obliquely away from each other at least regionally from the direction of the central web (10), preferably running at least regionally in a V-shape relative to each other.
