Abstract (en)

The arrangement comprises two vertically in the shaft (20) extending temporary support members (51, 52). An upper end of each temporary support member is fixed in an upper fixing point (F1, F3) and a lower end of each temporary support member is fixed in a lower fixing point (F2, F4). A measuring and marking device (60) is movably supported on the temporary support members so that the measuring and marking device is movable upwards and downwards along the temporary support members.
