Abstract (en)
[origin: CN112080847A] The invention relates to a looping tool and a warp knitting machine. The looping tool (1) is used for being installed in a groove of a guide bar of a warp knitting machine and is provided with long-strip-shaped metal looping pieces (2), and each looping piece is provided with a functional part (4) and a rod part (3). According to the invention, the looping tool (1) has a plurality of interconnected looping elements (2). The warp knitting machine has a guide bar and looping elements (2) arranged in the guide bar, each looping element (2) having a rod part (3) and a functional part (4), the guide bar having a plurality of grooves for receiving the looping elements (2). According to the invention, a plurality of interconnected looping elements (2) are arranged in each groove.
