Abstract (en)

The invention relates to a damper arrangement (10) for a fluid duct (50) having at least one duct portion (52) with one or more channels (12) projecting through a wall (16) of the duct portion (52) from an interior surface (22) to an exterior surface (24) of the duct portion (52) in an exit region (18), wherein a flexible element (32) is arranged on the exterior surface (24) of the wall (16) to overlap the exit region (18) of the one or more channels (12).
