Abstract (en)
The present invention discloses a rechargeable battery (100) and a battery module (200). A rechargeable battery (100) according to an exemplary embodiment of the present invention includes: an electrode assembly (120) that includes a first electrode, a second electrode, and a separator; a case (110) where the electrode assembly (120) is accommodated, and including one opened side; and a cap plate (115) that is combined to the one opened side of the case (110), and includes a plurality of vent portions (160) that are ruptured by an internal pressure of the case (110), wherein the plurality of vent portions (160) are arranged along a length direction of the cap plate (115).
