Abstract (en)
[origin: WO2018149564A1] The invention relates to a packaging line data switching exchange (2) having at least one temporary storage (6) for
packaging line state data comprising state values, and at least one data input interface (8), said data input interface (8) communicating with at least
one program module (14.1) adapted to a packaging unit (18a) of the packaging line, characterized in that the program module (14.1) generates, via
a data input interface (8), a machine data object comprising at least meta data of the packaging unit.
