Abstract (en)

[origin: WO2018149715A1] The invention relates to a connection device for connecting a conductor end (2), comprising a housing (3) and a current-guiding element (4), wherein an actuating element (9) that is movable in or on the housing (3) is provided for producing a state contacting the conductor end (2) or a state non-contacting the conductor end (2), wherein the actuating element (9) is designed as a plastic/metal composite element.
