Abstract (en)

The present invention relates to a system (1) designed to implement the automatic processing of coupons for contests or instant lotteries.The system (1) first of all comprises several detection means (3) of processed coupon data, apt to verify which type of game is implemented on the coupon itself and subsequently to detect the combination of graphic and/or alphanumeric symbols reported on the surface of game of the coupon.The system (1) further provides several removal means (7) of the film covering the surface of game of the coupon, activated once the type of game is recognized.The system (1) further comprises a control unit (11) programmed for the recognition of the combination of graphic and/or alphanumeric symbols detected as winning or losing.Again, the system (1) comprises automatic sorting means (9) for the treated coupons, depending on whether they are winning or losing.
