Abstract (en)
A lifting tool (1) for lifting a load of at least 1000 kg, comprising a substantially rigid main body (2) provided with a first connecting portion (4) configured for releasable attachment to a lifting device and a second connecting portion (6) configured for releasable attachment to a load. The main body (2) is made of a fiber reinforced material and further comprises an outer surface (8) covered at least in part by an impact resistant layer (10) comprising a polymer based material, a fiber reinforced resin, a fiber reinforced laminate or a combination thereof.
