Abstract (en)  
[origin: WO2018215586A1] The invention relates to a changeable frame that allows for the exhibits presented in the frame to be exchanged in a simplified manner. For this purpose, the changeable frame (1) according to the invention for presenting of exhibits (E) has a frame element (2), which surrounds a frame opening (3), in which during usage the presenting exhibit (E) is arranged so as to be visible from an observer side (S), a cut-out (9) being introduced into the frame element (2), which cut-out leads from the lateral outer surface (10) of the frame element (2) to the opposite inner surface (11) of the frame element (2) and opens into the frame opening (3) and is provided for the insertion of the respective exhibit (E) into the frame opening (3) and for the removal of the exhibit (E) from the frame opening. According to the invention, a drawer (25) is then slidably mounted in the cut-out (9), which drawer has a holder (26) for positioning the exhibit (E), the drawer (25) being slidable between a slide-in position, in which the exhibit (E) is visible in the frame opening (3), and a removal position, in which the holder (26) of the drawer (25) is outside of the frame element (2) for the removal of the exhibit (E) present in said holder.
