Abstract (en)
[origin: WO2018153940A1] The invention relates to a patient transport device comprising a subframe (12) having a lower frame (16) equipped with swivel casters and/or track rollers, having an upper frame (16), and having a lifting device (22), wherein the lifting device (22) has two operatively connected scissor lift units (24, 26), which are arranged one above the other and of which the lower scissor lift unit is coupled to a lower frame (16) and the upper scissor lift unit is coupled to an upper frame (20) of the lower frame (12). Furthermore, the patient transport device (10) has a reclining surface (14) having an end on the head part side (76) and an end on the foot part side (78), which can be converted into a chair seating surface.
