Abstract (en)
[origin: CA3054646A1] The invention concerns an exoskeleton device and a method for using such a device comprising at least one leg (2, 33) arranged to be coupled to a foot (5) of a user (6), a link member (7) between the top end (8) of the leg (2) with which it is articulated and a support arm (9) linked on one side to the leg or the link member (7) and on the other side to a tool holder element (10). The device comprises a grip bar (11, 34) arranged so as to be handled with two hands by the user, attached to the support arm (9, 34), in a parallel or substantially parallel manner, close to or on the tool holder element.
