Abstract (en)  
[origin: WO2018153795A1] Containers comprising multilayer heat sealable films which show good sealing ability through contaminations and good antifog properties for are disclosed. The multilayer heat sealable films enable a very efficient packaging process and results in containers which are environmentally friendly. The containers may consist out of a tray which consists out of crystalline polyethylene terephthalate (CPET) and/or amorphous polyethylene terephthalate (APET) and the container further consists out of a biaxially oriented multilayer heat sealable film. The containers are used for the packaging of fresh or processed meat, fish or poultry and well as for the packaging of cheese or fruits and vegetables.
