Abstract (en)
[origin: WO2018153539A1] The invention relates to a planar packaging element (1) for use in the production of an item of packaging (4), wherein, on at least one first surface (2) of said packaging element (1), a structure (3) is arranged which reduces susceptibility to adhesion. Said structure (3) consists of a material which can be removed in a removal step of a method, and said removal step can be applied to the finished packaging (4) which may or may not be filled with a product (5).
