Abstract (en)
[origin: WO2018162574A1] The invention relates to a sanitary fitting (1) having a water outlet (2) and a soap outlet (3) for discharging different fluids in the form of water and liquid soap, comprising a long-range sensor (5) for detecting the user in long range, comprising a short-range sensor (4) for detecting a hand of the user in short range, and comprising an optical display (6), as well as comprising a controller which is connected to the sensors (4, 5) and the optical display (6), and which controls the discharge of water (2) out of the water outlet (2) and of liquid soap out of the soap outlet (3), wherein the display (6) has a water display element (8) and a soap display element (9), characterised in that the controller is configured in such a way that only one of the display elements (8, 9) is only activated after the detection of the user in long range, and that the fluid displayed by the activated display element (8, 9) is discharged after the detection of a hand of the user in short range.
