Abstract (en)
[origin: WO2018153799A1] The invention relates to a handle (1) for a motor vehicle, comprising a mounting carrier (30) which can be secured on the inside of a door (2) of the motor vehicle, and a grip lever (10) that can be arranged on the outside of the door (2) of the motor vehicle and is secured to said mounting carrier (30). According to the invention, the mounting carrier (30) comprises a control element (40) that is operatively connected to a securing element (80) which can be arranged on the outside of the door (2), said control element (40) being movable from a retaining position (5) into a securing position (6) as the result of which the distance between the securing element (80) and the control element (40) can be reduced, thus allowing the mounting carrier (30) to be fastened to the door (2) in a reliable manner.
