Abstract (en)

[origin: WO2018154059A1] The invention relates to a fastening system for mounting a textile product in front of an opening in a wall. Said fastening system comprises at least one fastening mechanism designed to be mounted on the textile product. The fastening system further comprises at least one retaining mechanism designed to be mounted on a periphery of the opening in the wall. The fastening mechanism and the retaining mechanism are designed to be force-locked to each other.
