Abstract (en)
[origin: CA3044787A1] The invention relates to a fire protection element (100) for the separation of openings passing through walls or ceilings, in particular of line passages, comprising a molded part (112) made from intumescent material with a plurality of through-openings (116) for the passage of lines (121) which extend in particular parallel to each other from a first side (122) to an opposite second side (123) of the fire protection element (100) and are in each case tightly sealed relative to flue gas by a membrane (119).
