Abstract (en)

[origin: WO2018153858A1] The present invention relates to a burner group (1) comprising a burner body (2) that generates flames by the flammable gases being burned, that enables the cooking vessel placed thereon to be heated and that has an inner mixing chamber (3) wherein the gas and the ambient air are mixed and that feeds the inner flame circle, at least one vertical injector (4) that provides the delivery of gas to the inner mixing chamber (3), at least one outer mixing chamber (5) wherein the gas and the ambient air are mixed and that feeds the outer flame circle and at least one horizontal injector (6) that provides the delivery of gas to the outer mixing chamber (5); a burner head (7) that is disposed on the burner body (2) and that enables the flames to be delivered to the base of the cooking vessel from the holes arranged around the burner head (7), and burner cap (8) that is disposed on the burner head (7).
