Abstract (en)
[origin: CN110624703A] The invention relates to a sanitary shower head (1) comprising: a shower head housing (2) having a fluid inlet (3); a fluid chamber (4) in fluid communication with the fluid inlet in the shower head housing; and a beam disk (6) having at least one beam outlet opening (5), wherein the beam disk is arranged on a shower beam outlet side (7) of the shower head housing and is held on the shower head housing on the circumferential side and delimits the fluid chamber on the outlet side, and the beam disk is formed as an elastic disk, which can be elastically deformed from an initial contour (8) into a final contour by means of a fluid pressure in the fluid chamber. The fluid chamber is delimited on the side opposite the beam disk by a delimiting surface, which extends at least in a facet region in accordance with an initial contour, and/or which extends in an inwardly arcuate manner in the direction of the fluid chamber.
