Abstract (en)

A filter cleaning unit includes a brush fastening part that stores a brush placed along one direction of a filter, a drive mechanism that moves the brush fastening part in a direction perpendicular to the one direction and along a surface of the filter, and a collection box unit (38) that is located on one surface side of a grille and is moved together with the brush fastening part by the drive mechanism, wherein the collection box unit (38) has a collection box (39) in which dust and dirt removed by the brush are collected, a support part (40) connected to the grille and placed above the collection box (39), and a lock part (57) capable of fastening the collection box (39) to the support part (40).
