Abstract (en)
An electronic device has a sealing part 90, a first terminal 11 projecting outward from a first side surface of the sealing part 90, a second terminal 13 projecting outward from a second side surface different from the first side surface of the sealing part 90, an electronic element 95 provided inside the sealing part 90, and a head part 40 coupled to the first terminal 11 and the second terminal and connected to a front surface of the semiconductor element 95 via a conductive adhesive 75.
