Abstract (en)
[origin: WO2018158159A1] The invention relates to a wall for a furniture carcass (10), having a panel-type core (41) which is arranged between two laterally positioned cover layers (43a, 43b). The core (41) has a cut-out (42) which extends at least along one section of an end face (413) of the wall and is used to receive a fitting (30) that guides a movable furniture part. The wall is characterized in that the fitting (30) rests at least against one of the cover layers (43a, 43b). The invention additionally relates to a method for producing such a wall and to a furniture carcass (10) or furniture comprising such a wall.
