Abstract (en)

[origin: WO2018158790A1] The method for producing meshes, in particular made of metal, consisting of the union of a plurality of parallel and suitably spaced longitudinal wires (3) and of a plurality of suitably spaced transverse wires (4), provides to power on a feeding unit (20) of the transverse wires (4) through an advancement surface (P) of the longitudinal wires (3) from one side to the opposite side of said advancement surface (P), so as to feed the transverse wire (4) on the opposite side to realize a further mesh (2) correspondingly.
