Abstract (en)
[origin: WO2018158688A1] Ozone generator device (100) for an internal combustion engine comprising at least a transformer (101), at least one support (102), and at least one pair of electrical wires (103, 104) arranged in a spiral around the at least one support (102) at a distance comprised between 2 mm and 5 mm each other for the generation of micro- electrical discharges and having first ends connected to the transformer (101). The electric wires (103, 104) comprise second free isolated ends.
