Abstract (en)
[origin: WO2018158188A1] The present invention relates to a multilayer interference pigment (1) comprising successively: a metal core (2) in the form of a flake, said metal core (2) comprising a material selected from among gold, silver, palladium, rhodium, ruthenium, platinum, osmium, iridium and one of the alloys thereof; a first layer (3) of a transparent dielectric material; and a second discontinuous metal layer (4).
