Abstract (en)

[origin: WO2018158599A1] Pellet furnace equipped with a burner provided with grate, comprising a burning space (11) in which the pellets are received on the grate, and an incinerator unit (14) arranged close to the burning space (11), wherein the interior of the burning space (11) designed as a sluice burner comprises a lower grate (12) and an upper grate (13) arranged in different heights, said grates (12, 13) can be removed from the burning space (11) in lateral direction and during such removal of the grates (12, 13) any ash thereon cannot follow the space receiving the lower and upper grates (12, 13), and for receiving the dropping of the collected ash an ash collector is arranged under the burning space (11).
