Abstract (en)

[origin: WO2018158292A1] The invention relates to a method for controlling a circulation pump having variable rotational speed in a hydraulic system, in particular in a heating system. The method provides for control of the rotational speed of the circulation pump in accordance with a stored static control characteristic curve and switches over the pump operation to a dynamic control characteristic curve when a steady operating point of the hydraulic system is detected. The invention further relates to a circulation pump having a controller for carrying out the method according to the invention.
