Abstract (en)

[origin: WO2019004960A2] Invention, used for electrical conduction in industry, is about CEE norm plugs and sockets which provide quick coupling. In particular, the invention is about CEE norm plugs and sockets which consist of a lever step (11) on the end to hold it in place at equilibrium point, which are mounted outwardly and open the cable entry by pushing the spring when they are mounted and permit the cable entry at this point, which tighten the cable with spring force thanks to the lever moving inward.
