## Abstract (en)

[origin: EP3590383A1] The present invention relates to a cosmetic container for two kinds of cosmetics. The cosmetic container includes: an upper container 10 containing a second cosmetic and configured to be rotatable; a lower container 20 containing a first cosmetic; a handle part 30 detachably coupled to the lower end of the upper container 10 and the upper end of the lower container 20; a discharge part 40 provided so as to enable discharging of the second cosmetic. The present invention exhibits an effect in that only the desired one of the two kinds of cosmetics can be used, or the two kinds of cosmetics can be used, sequentially or mixed together, through a single tip by a simple operation of the cosmetic container. Also, the present invention enables contouring to be performed by discharging and using a necessary amount of the second cosmetic after using the first cosmetic, thus exhibiting an effect of enabling the appearance of the skin to have accentuated facial contours or have a three-dimensional effect according to the type of formulation (the first cosmetic is a BB cream, and the second cosmetic is a highlighter, shading or blusher, etc.). Also, the cosmetic container can be used as a cosmetic container for skin care and skin protection by using a cream formulation as the first cosmetic and a serum as the second cosmetic, or a sun-care formulation as the first cosmetic and a cooling product as the second cosmetic.
