Abstract (en)

[origin: KR20200003720A] A method of stacking and packaging grounding products (6) comprises the following steps of: forming a lamination (8) of the grounding products (6) arranged in an upright position, one after the other in rows in a transport direction (T); arranging the lamination of the grounding products (6) in a delivery area (10) above a receptacle (36) on at least one support element (39) supporting the lamination (8) perpendicular to the transport direction (T) in the delivery area (10); discharging the lamination (8) at right angles to the transport direction (T) by shifting or pivoting at least one support element (39); and pushing the lamination of the grounding products at right angles to the transport direction from the delivery area (10) into the receptacle (36) by a push device (12).
