Abstract (en)
[origin: US2020010228A1] The invention relates to a processing apparatus for packaging machines having at least one upper processing unit for processing upper package sides and at least one lower processing unit for processing lower package sides, and having a common adjustment axle for the processing units along which the processing units are adjustable manually or by means of a drive in an adjustment direction that extends in parallel with a direction of transport of the packaging machine.
