Abstract (en)
A hinge (1) for pieces of furniture comprises a first end portion (2) suitable for being coupled with either a structure of the piece of furniture, such as a side or an upright, and a door movable with respect to such structure, a link member (3) subject to a spring (7) and connected to such first hinge portion (2) and suitable for being connected to a second hinge portion (4) coupled with the other of said structure, such as a side or an upright, and said door, said link member (3) comprising first and second interconnected elements (5, 6) connected to the first and second hinge portions (2, 4) respectively, a dampening element (8), equipped with a piston (64) and a cylinder (77), being provided, suitable for braking at least the closing movement of the hinge (1) whereby the door moves towards the structure of the piece of furniture, such dampening element (8) being associated with the second element (6) of the link member (3) of the hinge, a first and a second gear elements (51, 55) being provided, permanently engaged to each other and integrally with said first and second interconnected elements (5, 6) respectively, the second gear element being connected in a selectively separatable manner to said dampening element and activating the latter along with the movement of the hinge only when they are connected to each other.
