Abstract (en)
[origin: EP3591448A1] [Problem] To allow a cleaning member to be fully in contact with a portion where an optical signal enters and is emitted.
[Solution] This disclosure is a cleaning tool for cleaning an optical connector, the cleaning tool includes an adhesive part to be in contact with an optical signal region where an optical signal enters and is emitted in the optical connector. The adhesive body includes a protrusion protruding in a region to be in contact with the optical signal region.
