Abstract (en)

[origin: WO2018163058A1] Assembly (1) for dispensing washing agents in the washing chamber (C) of a washing machine, including an integrated dispensing device for washing agents (2), comprising a body (2a) which is intended to be mounted through an opening of a sheet-like wall (F) which delimits the washing chamber (C). The assembly (1) further comprises a reservoir (3) for liquid detergent which may be removably coupled to the body (2a) of the device for dispensing washing agents (2), and which may be positioned on the side of the device for dispensing washing agents (2) intended to face the washing chamber (C). The reservoir has a holding chamber (3d) for liquid detergent able to communicate with the outside of the reservoir (3) through at least one outlet opening (12b) for dispensing liquid detergent and an actuator assembly (21, 22, 23, 24) to control the dispensing of liquid detergent from the reservoir (3).
