Abstract (en)

[origin: WO2018162160A1] Disclosed is a user terminal, a means of transport, a server, a computer program product, a signal sequence and a method for sending for a first means of transport (10). The method comprises the steps: an actuating device (5) of a first user terminal (3) is actuated; in response thereto, a wireless message is sent (from the user terminal) to a server (7); the first means of transport (10) is assigned to the user terminal (3); first colour information is assigned to the first user terminal (3) and the assigned first means of transport (10); and light is emitted by the first means of transport (10) and the first user terminal (3), the identical colour of which is defined on the basis of the first colour information.
