Abstract (en)
In an embodiment, a cosmetic container is disclosed. The cosmetic container may include a housing (300), on both end parts, a first opening (312) and a second opening (322), respectively; a controller (400) having at least a part exposed to an external atmosphere in one area of the housing and turning according to a user's operation; a first receiver (500) close to the first opening (312), provided in the housing and accommodating a first cosmetic product (S1); a second receiver (600) close to the second opening (322), provided in the housing and accommodating a second cosmetic product (S2); and a lifting rod (700) connecting the first receiver (500) and the second receiver (600) and moving the first receiver (500) and the second receiver (600) in a first direction towards the first opening (312) or in a second direction towards the second opening (322) in response to a turning direction of the controller.
