Abstract (en)

The invention relates to a method for decontaminating an automotive tank (1) for an aqueous solution (3) comprising an ultrasound sensor (11, 12/13/15) arranged for measuring a parameter of the solution (3) stored in the tank (1). The method comprises a step of using the ultrasound sensor (11, 12/13/15) for emitting sound waves at a frequency and an intensity adapted to decontaminate the tank (1).
