Abstract (en)

[origin: WO2018132858A1] The invention relates to an athletic cleat (3), in particular for a football shoe. The athletic cleat (3) is designed to be received in a cleat receiving area (4) in the sole (2) of the athletic shoe (1). The athletic cleat (3) has a cleat element (5) with a cleat element base (7), a cleat element cover surface (8), and a through-bore (11) which extends between same. The shaft (12) of a screw (6) passes through the through-bore (11) of the cleat element (5), said screw being designed to secure the cleat element (5) in the cleat receiving area (4), wherein a screw head (9) projects beyond the cleat element (5), a contact surface (10) of the screw head (9) lies against the cleat element cover surface (8), and a support surface (13) is formed on the screw head (9).
