Abstract (en)
[origin: WO2018166854A1] The invention relates to a pole handle (1) for walking poles, trekking poles, alpine ski poles, cross-country ski poles or Nordic walking poles, comprising a length-adjustable hand strap (2), wherein the strap length is fixed using a blocking element arranged in the handle body. A first end of the hand strap is secured in a top section (4a) of the handle body (4), wherein a mid-section (2d) of the strap is introduced into a recess (6) of the handle body (4), is deflected about a deflection element (11) in the recess (6), and passes downwards out of the handle body as the free second end (2b). The blocking element is pressed onto a lower strap section (2e) in order to block the adjustability of the length of the hand strap.
