Abstract (en)
[origin: WO2018166838A1] The invention relates to a panel structure (1) for a drawer (4, 5), comprising a panel base (9) and a panel top (10) that has at least the following features: two support assemblies (200, 300) and at least one surface element (400). Each of the two support assemblies (200, 300), on their sides next to the surface element (400), have a receiving channel (201, 301) of a U-shaped cross-section, a first and second edge (402, 403) of the surface element (400) engaging in respective receiving channels (201, 301). The panel structure is characterized in that one or both of the support assemblies (200, 300) are in the form of an angular arrangement, and one of the support assemblies can be fastened to the panel top (9) and to the front panel (6).
